

SR A1A RESILIENCY PLAN OPTIONS: SECANT WALL

Pros

- Seawall provides backstop to erosion
- Relatively low environmental impact
- Does not require anchor installation
- Good for areas with near surface bedrock
- FRP - Corrosion-resistant reinforcing – Glass Fiber-Reinforced Polymer (GFRP) rebar (low maintenance costs)

Cons

- More expensive than other wall materials
- Complex/costly installation
- May deflate beach fronting wall during storm events

BURIED WALL WITH VEGETATION
